

# MY SMILE ARC STORY

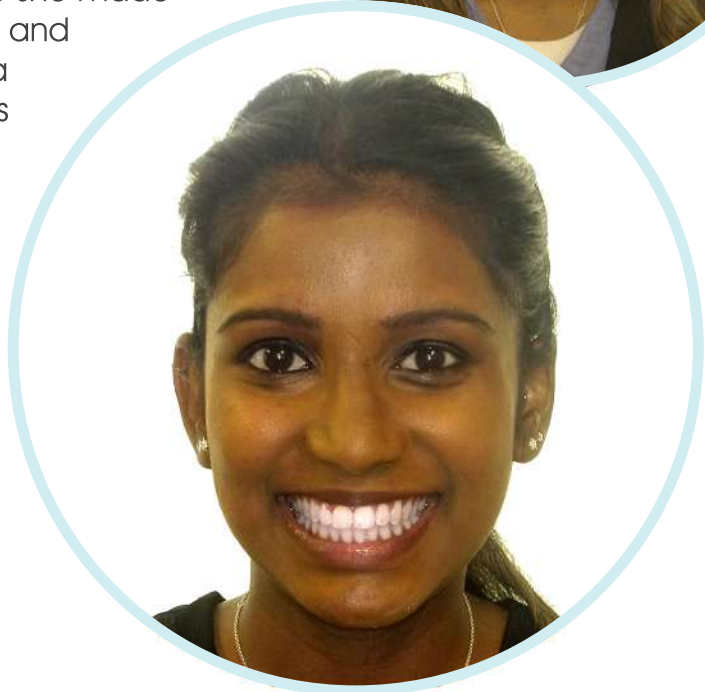

By Andrea T.

I was nervous about getting braces at 25. Because Yes, of course people will notice. But it'll only be a big deal if you make it one. I am fortunate, at my ortho office about a third of the patients are adults and I'm not the only one. I could already see my progress in 3 months and my smile had character. Dr DeLurgio already knew what she wanted for me when she saw my smile and told me about the Pitts21 brackets. I told her I trusted her and as a result I definitely had fewer appointments, no broken brackets, an esthetic braces smile with no extractions. She even told me I would have fuller lips at the end of my treatment and I do!

Because there are many things to consider when deciding to get braces as an adult, it's important that you work with someone you trust and who can give you the best care possible. When Dr. DeLurgio, approached me about writing my experience, I was glad to do it because she made my complicated case feel less intimidating and more fun. She is so smart and always took a genuine interest in me as a patient. I always appreciated how excited she was to treat me and took the time to explain each step of the process along the way. I am forever grateful to have Dr DeLurgio as my orthodontist because nobody would care for her patients the way she does.
